MEDIA TRANSLATION

Translating media contents requires skills and creativity.

Differently from medical, legal or scientific documents that try to communicate a specific information to the reader, media contents and marketing documents usually aim at conveying a precise feeling through symbolism, metaphors, play on words and puns.

Lexis Translate staff can help your company or organization to empower your message in different languages all over the world.

During the past years, several surveys have shown that, even when people speak english proficiently, they are more likely to buy products with translated product information and localized interfaces.

Data clearly demonstrate that consumers want to learn about a product in their own language and prefer those products that have been adapted to their cultural environment.

Lexis Translate can help you with your multilingual projects and to develop suitable strategies to improve communication with your clients!
